ANNUAL REPORT FOR IPR 2021-22

S.NO.	NAME OF THE SEMINAR/CONFERENCE/ WORKSHOP	NUMBER OF PARTICIPANTS	DATE	RESOURCE PERSON
1.	Project selection	44	12/4/2022	Dr.Abhimanyu
2.	Research Based Solely On Observations	25	20/05/2022	Dr.Vijaya Lakshmi
3.	Grants and research proposals	41	10/07/2022	Dr.Aruna Kulkarni
4.	Biomedical literature critique	30	9/3/2022	Dr.Gopalakrishnan
5.	Fundamentals of Biostatistics	45	21/7/2022	Dr.Rupali Thakur
6.	A review on Evidence-based decision-making	16	21/11/2021	Dr.Gagandeep Singh
7.	Evidence-based practice based on an analysis of the existing research	46	23/6/2022	Dr.Preethi Suri
8.	Proficiency in Scientific Writing	11	16/09/2021	Dr.Sony Patel
9.	Research methodology : Methods and Techniques	39	3/9/2021	Dr.Ananth

EVENT REPORT

Name Of The Activity	Project selection	
Type Of Activity	Seminar	
Date And Time Of Activity	12/4/2022	10.30AM
No. Of Participants	44	
Resource Person	Dr.Abhimanyu	
Coordinators	Mr. M. Shiva Raj	
Description	<p>The principal addressed the gathering and welcomed the guest. The HOD introduced about the guest and handled over to the speaker.</p> <p>He continued that the Project selection is an integral part of a company's process for choosing a project with the highest priority to accomplish. Projects and project completion can be important in transforming a company. Selecting the right project could create a better return on investment for a company, increase efficiencies, shorten time-to-market and lead to successful project delivery. In this article, we discuss what project selection is, why it is important and list some steps on how to select a project effectively. Once project managers receive project ideas or proposals, they often go through a process to assess and select a project that will move forward.</p> <p>Finally HOD delivered the vote of thanks and the guest was felicitated with a momentum</p>

EVENT REPORT

Name Of The Activity	Grants and research proposals	
Type Of Activity	Seminar	
Date And Time Of Activity	10/07/2022	10.00AM
No. Of Participants	41	
Resource Person	Dr.Aruna Kulkarni	
Coordinators	Mr. M. Shiva Raj	
Description	<p>The principal addressed the gathering and welcomed the guest. The HOD introduced about the guest and handled over to the speaker.</p> <p>The speaker stated that the purpose of this exercise is to introduce a step-by-step guide to planning and writing project proposals incorporating project management techniques for external funding . To contextualise the various steps and procedures, the project development is discussed. This serves two purposes; it provides to prepare a written report for competitive grant and also for planning an analytical study, or both. one important area of concern in research is writing appropriate proposals for funding. This is required for both the researchers to design and plan their research and for sponsor agencies to evaluate it in the pre-sanction phase and to monitor its progress in the implementation phase. For writing the proposal, it is important to understand the skills for project development and the sponsor system. Then he concluded</p> <p>Finally the HOD delivered the vote of thanks and the guest was felicitated with a momentum.</p>

EVENT REPORT

Name Of The Activity	Fundamentals of Biostatistics	
Type Of Activity	Seminar	
Date And Time Of Activity	11/7/2022	10.00AM
No. Of Participants	46	
Resource Person	Dr.Rupali Thakur	
Coordinators	Mr. M. Shiva Raj	
Description	<p>The principal addressed the gathering and welcomed the guest. The HOD introduced about the guest and handled over to the speaker.</p> <p>The speaker said with the Biostatistics is the application of statistical principles to questions and problems in medicine, public health or biology. One can imagine that it might be of interest to characterize a given population (e.g., adults in Boston or all children in the United States) with respect to the proportion of subjects who are overweight or the proportion who have asthma, and it would also be important to estimate the magnitude of these problems over time or perhaps in different locations. In other circumstances in would be important to make comparisons among groups of subjects in order to determine whether certain behaviors (e.g., smoking, exercise, etc.) are associated with a greater risk of certain health outcomes. It would, of course, be impossible to answer all such questions by collecting information (data) from all subjects in the populations of interest.</p> <p>Finally the HOD delivered the vote of thanks and the guest was felicitated with a momentum.</p>

EVENT REPORT

Name Of The Activity	A review on Evidence-based decision-making	
Type Of Activity	Seminar	
Date And Time Of Activity	21/11/2021	11.00AM
No. Of Participants	16	
Resource Person	Dr.Gagandeep Singh	
Coordinators	Mr. M. Shiva Raj	
Description	<p>The principal addressed the gathering and welcomed the guest. The HOD introduced about the guest and handled over to the speaker.</p> <p>The speaker stated The number of studies published in the biomedical literature has dramatically increased over the last few decades. This massive proliferation of literature makes clinical medicine increasingly complex, and information from multiple studies is often needed to inform a particular clinical decision. However, available studies often vary in their design, methodological quality, populations studied and may define the research question of interest quite differently, which can make it challenging to synthesize their conclusions.</p> <p>Finally the HOD delivered the vote of thanks and the guest was felicitated with a momentum.</p>
