Session about personality development, group discussion. He explained students which path is helpful for them also he helped them to explain how they improve their personality, mental ability</p> <p>He explained about the notion that everyone has the potential to be creative doesn't effectively increase competition and make it harder to be recognized as a professional creative industries practitioner. Even though everyone is in some way creative or imaginative does not mean that they will be successful. This is because of three main reasons. Some people have greater ability at being creative and imaginative than others. Some people don't have the time or resources necessary to reach their creative potential. And others simply think that creativity is not something that they can make aliving from and therefore don't embrace or develop their imagination.</p>
